

AJINKYA POL

"Ajinkya Pol is a highly motivated and results-driven professional based in Mumbai, Maharashtra, India. With a diverse skill set and a background in project management, data analytics, and business process improvement, Ajinkya offers a unique perspective and approach to solving complex problems. His educational background includes a Postgraduate Diploma in Big Data Analytics, an MBA in Operations, and a Bachelor's in Mechanical Engineering, equipping him with the skills and knowledge needed to excel in his career.

Ajinkya has developed expertise in Big Data analytics and Visualization, with proficiency in various RDBMS technologies such as MySQL, programming languages such as Python and Java, and Big Data technologies like Hadoop, Hive, and Spark. He also possesses practical experience using AWS Cloud services, including EC2, S3, Lambda, EMR, and Athena for data collection, processing, analysis, and visualization. His ability to work with diverse technologies and platforms has been an asset throughout his career.

With a career spanning various industries, including IT, automobiles, and services, Ajinkya has accumulated valuable experience. As a Project Coordinator at Bureau Veritas Group, he successfully managed project-based tool releases and new solution deployments. This role required strong skills in System Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) to ensure the quality and success of projects. Ajinkya conducted system testing, regression testing, performance testing, and functionality testing, consistently delivering high-quality results.

He is a full-time faculty member. In this role, he imparts knowledge in various subjects, including Operations Research, Operations Analytics, Project Management, and Information Technology for Management, dedicated to educating and upskilling students for success in their future endeavours. He is fun-loving and extremely passionate about academics and loves to interact with students to help and guide them. He is extremely popular among the student fraternity for his unique ability to understand their issues and concerns with empathy and patience and mentor them. He has a strong sense of community development and teamwork. He is an avid trekker and is the most eager participant in all college events."
